

PRESS RELEASE

02 September 2021

REMINGTON PHARMACEUTICALS SUCCESSFULLY ATTAINS WHO PREQUALIFICATION

Remington Pharmaceuticals takes pride in becoming Pakistan's first nationally-owned pharmaceutical company to attain the World Health Organization (WHO) Prequalification (Geneva HQ) which is a trusted and reputed symbol for safety, quality and efficacy across the stakeholders globally. The company has attained WHO Prequalification for an anti-tuberculosis oral solid finished pharmaceutical product (Levofloxacin 250 mg film-coated tablets) <https://extranet.who.int/pgweb/news/remington-levofloxacin-tablet-prequalified>.

The vision of our esteemed Chairman, Dr. Abdul Qadeer Khokhar, to provide medicines of world-class quality to the People of Pakistan & Beyond for putting Pakistan on the global pharmaceutical map, has made this feat possible.

The company with its set goal of achieving approvals from Global Stringent Regulatory Authorities (SRA), is well on its way to obtain MHRA, EMA, PIC/s and other SRA approvals for multiple dosage forms including, oral solids (tablets, capsules and dry suspensions), sachets, sterile ophthalmic preparations, nasal sprays, and oral liquids.

We are highly grateful to the WHO PQ Team (PQTm), which gave us the opportunity to participate in the WHO Prequalification Programme and guided us throughout the way. In particular the, WHO's initiative of conducting Joint UNICEF-UNFPA-WHO Virtual Meetings with the Manufacturers and Suppliers were instrumental for us in developing a deep and vivid understanding of the requirements and processes of the Programme. In addition, we also greatly benefited from the one-on-one meetings we had with the Assessment and Inspection Teams, and our interactions with global agencies including including StopTB Partnership, GDF, UNICEF, UNITAID, MPP and others also played a fundamental role in this pathway.

We are equally thankful to the Drug Regulatory Authority of Pakistan and Ministry of National Health Services Regulations and Coordination for supporting us exceptionally in this important project of national importance.

And utmost compliments to all Team Remington; who showed that if we set our sight on any target, together we achieve it as ONE TEAM. Future holds great ventures for us as an Organization, as a Team and collectively as a Nation!
